NATIONAL CITIZENS NEIGHBORHOOD WATCH
SECURING THE AMERICAN BORDER

Minuteman Civil Defense Corps Takes Action Minuteman Border Fence. HELP BUILD IT NOW!

(PHOENIX, AZ) April 20, 2006 – Chris Simcox, President of the Minuteman Civil Defense Corps (“MCDC”), today announced plans by the MCDC to work with local Arizona land owners to build border security fencing on private land along the border with Mexico.

At present, six private land owners have partnered with the Minutemen for the commencement of construction of border fencing on their land. Surveillance cameras on the fencing will be monitored via computer by registered Minutemen across the country. We have chosen a fence design that is based on the Israeli fences in Gaza and on the West Bank that have cut terrorist attacks there by 95% or more. In order to be effective, a fence should not be easy to compromise by climbing over it with a ladder, cutting through it with wire cutters, ramming it with a vehicle, or tunneling under it undetected. No fence can be a 100% impenetrable barrier—but a good design will be time-consuming enough to get through that Border Patrol agents can be alerted to get to a point of attempted intrusion before the intrusion can be completed. Our design does this. You can see it at www.WeNeedAFence.com

Simcox says those involved in the planning hope to keep costs near \$150 per foot.

Two construction companies to date have offered to inaugurate groundbreaking, coordinate volunteer construction crews and donate the use of the necessary heavy construction equipment.

The groundbreaking will begin in Arizona on Memorial Day weekend, unless in the interim President Bush deploys National Guard and reserve troops to immediately secure the out-of-control southern border.

The fencing will be built with privately donated funds, engineering and labor and will be used as an example to educate the public about the feasibility and efficacy of fencing to secure America’s borders from illegal incursion by aliens and international criminal cartels. A non-profit organization dedicated specifically to this purpose will facilitate and administer donations for construction of the fence. Monetary and in-kind contributions for this effort will go directly into meeting hard

costs like building materials for this private, volunteer fencing operation.

Simcox issued the following statement regarding the MCDC Border Fence:

“President Bush said he would not wait on events to act to protect our country. He has been president for over five years, and still he has not acted to secure our territorial frontier, even as his administration admits the United States government does not have operational control of our borders.”

“On Memorial Day weekend, the American people will exercise their God-given rights to protect their lives and property by initiating construction of fencing along the border on private land unless President Bush immediately deploys National Guard and/or reserve troops along the breadth of the Southwestern border line with Mexico, thereby retaking the region from the international criminal cartels who presently are in operational control of the border. Re-enforcements for the Border Patrol are available from military units presently training to guard the borders in other countries such as Iraq and Afghanistan and they should immediately relocate their training to the Southwestern border.

“The existing border crisis is a dereliction of duty by those entrusted with American security and sovereignty, leaving America vulnerable to terrorist infiltration and an unprecedented crime wave caused by drug smugglers, rapists, thieves, human traffickers and murderers who currently cross our border at will.

“President Bush and Congress have taxed the wages of the American people to pay for the protection of our country, and expended those dollars to subsidize millions of low-wage illegal workers with housing, education, medical care, and welfare benefits. Yet even the most basic level of national territorial integrity requires that our elected representatives secure the border. Should they continue to refuse to do their Constitutional duty, the Minutemen will again step into the breach and commence building the required border barriers on private land and with private donations.”

The MCDC welcomes all those who want to secure America to join us as we lead the way with this bold initiative. We believe that one successful first step in erecting an American border fence CAN move

public opinion sufficiently to make the politicians act. If they continue to fail in their obligations, citizens will simply have to do it all. Minuteman Civil Defense Corps has shown that illegal aliens can be stopped by little more than dedicated volunteers willing to sit, watch and report for 30 days at a time. The Minuteman Border Fence will help protect all of the American people 365 days every year.

“Should President Bush and Congress fail to fulfill their oaths of office, and continue to shirk their Constitutional responsibility to protect these United States from invasion, we, the sovereign people of the United States, having suffered a long train of abuses at the hand of a willfully insolent government, do hereby declare that these States ought, should and will be protected by American Minutemen.”

Sincerely,

Chris Simcox, President
Minuteman Civil Defense Corps
